

ANTONY REQUINTINA

SOLUTIONS ARCHITECT | SOFTWARE ENGINEER

CONTACT

- +63 926 039 2214
- anthercam21@gmail.com
- Cebu, Philippines

CORE EXPERTISE

- Architecture & Design:**
Distributed Systems,
Software Architecture,
Design Patterns, Enterprise
Application Integration (EAI)
- Backend Development:**
.NET (C#), ASP.NET, Web
APIs, PHP (Laravel),
Microservices, RESTful
Services
- Frontend Integration:**
React.js, TypeScript, HTML,
CSS, Node.js
- Cloud & DevOps:**
Azure (App Services,
Functions, Storage, CI/CD),
AWS, Docker
- Performance & Security:**
Application Optimization,
Secure API Design,
Monitoring & Logging,
Unit/Integration Testing
- Leadership & Collaboration:**
Technical Leadership, Client
Communication, Agile/Scrum,
Cross-functional Teamwork

EDUCATION

**BS Information Technology
Cum Laude**
University of Cebu - Banilad
2015

PROFESSIONAL SUMMARY

Solutions Architect and Software Engineer with 10+ years of experience in enterprise architecture, solution design, and building scalable, high-performance applications. Proven expertise in .NET/C#, ASP.NET, PHP (Laravel), RESTful APIs, Azure Cloud, and microservices architecture. Skilled in designing secure and reliable distributed systems, optimizing application performance, and leading cloud adoption initiatives. Strong background in stakeholder engagement, cross-functional team leadership, and mentoring developers, with a track record of driving engineering excellence through coding standards, quality testing, and system design best practices.

PROFESSIONAL EXPERIENCE

Solutions Architect

Avensia Philippines Inc. | Cebu, Philippines | Oct 2021 – present

- Translate complex global client requirements into scalable, secure, and resilient enterprise architectures utilizing .NET/C#, RESTful APIs, and Azure Cloud infrastructure.
- Lead the design and implementation of enterprise-grade backend ecosystems, improving system availability and reducing architectural technical debt.
- Partner directly with product management and executive stakeholders to conceptualize new product offerings, accelerating time-to-market for strategic initiatives.
- Provided technical leadership and mentorship across engineering teams; establish robust coding standards, automated CI/CD pipelines, and testing frameworks that improved overall delivery quality.

Software Engineer

Oppy | Colorado, US | Part-time | Jan 2024 – Oct 2025

- Maintained business-critical back-office platforms using PHP (Laravel) backends and Node.js/React.js (TypeScript) frontends, ensuring high availability and seamless data layer synchronization
- Optimized internal workflow automation tools, slashing process latency by 25% and engineering multi-department operational efficiencies.
- Collaborated with enterprise architects to implement secure, highly documented API structures aligned with strict compliance and corporate standards.
- Drove engineering excellence by introducing modern version control workflows, automated unit testing, and continuous integration pipelines.

Software Engineer

Inspire Team Philippines | Cebu, Philippines | Aug 2017 – Oct 2021

- Developed high-volume backend data integrations between inriver PIM, enterprise CMS, and core ERP systems using C# and RESTful APIs to ensure seamless, real-time data flows.
- Engineered scalable asynchronous import/export data pipelines, drastically improving master data lifecycle accuracy and eliminating manual reconciliation friction.
- Extended core PIM platform capabilities through custom API development and specialized plugins, optimizing operational throughput for client digital asset management teams.
- Championed Agile delivery mechanics, leading sprint execution, technical code reviews, and cross-functional problem-solving initiatives.

Technical Specialist

Alliance Software Inc. | Cebu, Philippines | June 2015– Aug 2017

- Engineered backend services and core business logic utilizing ASP.NET and Angular to deliver high-availability, multi-tenant enterprise web applications.
- Maintained and optimized legacy mission-critical workflows and system integrations spanning Lotus Notes and modern .NET environments.
- Refactored bottlenecked backend logic and enhanced API route designs to improve overall application performance and data retrieval reliability for corporate clients.
